LCGC

Chromatographyonline delivers practical, nuts-and-bolts information to help scientists and lab managers become more proficient in the use of chromatographic techniques and instrumentation. **Article:** *Trends and Developments in Sample Preparation*. By Kate Jones, Managing Editor, The Column. A snapshot of key trends and developments in sample preparation according to selected panel lists from the chromatography sector. [Read more](#)

Scientia Chromatographica

Scientia Chromatographica is the first and to date the only Latin American scientific journal dedicated exclusively to Chromatographic and Related Techniques. With a highly qualified and internationally recognized Editorial Board, it covers all chromatography topics in all their formats, in addition to discussing related topics such as “The Pillars of Chromatography”, Quality Management, Troubleshooting, Hyphenation (GC-MS, LC-MS, SPE-LC-MS/MS) and others. It also provides columns containing general information, such as: calendar, meeting report, bookstore, etc. [Read more](#)

Select Science

SelectScience® has transformed global scientific communications and digital marketing over the last 23 years. Informing scientists about the best products and applications. Connecting manufacturers with their customers to develop, promote and sell technologies promotes scientists and their work, accelerating the communication of successful science. Scientists can make better decisions using independent, expert information and gain easy access to manufacturers. SelectScience® informs the global community through Editorial, Features, Video and Webinar programs. [Read more](#)

Spectroscopy

With the *Spectroscopy* journal, scientists, technicians, and lab managers gain proficiency through unbiased, peer-reviewed technical articles, trusted troubleshooting advice, and best-practice application solutions.

Peer-reviewed research: *Growth and Temperature-Dependent Spectral Properties of Yb³⁺, Tm³⁺ Co-Doped NaY(MoO₄)₂ Crystal*. By: Xi Wang, Zongyue Chen, Jianyu Zhang, Shangke Pan, and Jianguo Pan. NaY(MoO₄)₂:Yb³⁺/Tm³⁺ as a NIR laser crystal has a strong potential application prospect in optics and photonic devices. [Read more](#)
