LCGC

Chromatographyonline delivers practical, nuts-and-bolts information to help scientists and lab managers become more proficient in the use of chromatographic techniques and instrumentation. **Recent research by the Analytical Chemistry Group of the University of Valladolid (Spain) focused on determining nine plasticizers in honey samples by GC-MS.** LCGC spoke to Silvia Valverde and Ana María Ares of this group about their research and the resulting article. [Read more](#)

Scientia Chromatographica

Scientia Chromatographica is the first and to date the only Latin American scientific journal dedicated exclusively to Chromatographic and Related Techniques. With a highly qualified and internationally recognized Editorial Board, it covers all chromatography topics in all their formats, in addition to discussing related topics such as “The Pillars of Chromatography”, Quality Management, Troubleshooting, Hyphenation (GC-MS, LC-MS, SPE-LC-MS/MS) and others. It also provides columns containing general information, such as: calendar, meeting report, bookstore, etc. [Read more](#) 

Select Science

SelectScience[®] has transformed global scientific communications and digital marketing over the last 25 years. Informing scientists about the best products and applications. Connecting manufacturers with their customers to develop, promote and sell technologies promotes scientists and their work, accelerating the communication of successful science. Scientists can make better decisions using independent, expert information and gain easy access to manufacturers. SelectScience[®] informs the global community through Editorial, Features, Video and Webinar programs. [Read more](#)

Spectroscopy

With the *Spectroscopy* journal, scientists, technicians, and lab managers gain proficiency through unbiased, peer-reviewed technical articles, trusted troubleshooting advice, and best-practice application solutions. **Article:** *Analysis of Organometallic Compounds and Metallic Particles in Specialty Gases by Direct Injection using Gas Exchange Device (GED) coupled to ICP-MS.* By C. Stephan, A. Hineman, R. Merrifield. The authors introduce the concept of GED and how it can be used to monitor organometallic compounds and metallic particles in specialty gases.
