IBERO MS 2024 Conference – Science and Collaboration in Mass Spectrometry

IBERO MS 2024, held from December 8 to 11 at the Grand Carimã Hotel & Resort in Foz do Iguaçu, brought together experts from around the world to discuss advancements in mass spectrometry.

Organized by the Brazilian Society of Mass Spectrometry (BrMASS), the event has established itself as a major scientific gathering in Latin America, promoting researcher integration and knowledge exchange in the field. The congress featured a robust program, including keynote lectures; technical sessions; poster presentations; and workshops covering topics such as proteomics, metabolomics, environmental analysis, and clinical applications of mass spectrometry.

During the event, the BrMASS – Manuel Riveros Medal was awarded. The honorees were: Prof. Dr. Leonardo Silva (Talca, Chile), researcher Oscar Vega Bustillos (IPEN, Brazil), Dr. Livia Eberlin (BCM, USA), Prof. Dr. Débora Azevedo (UFRJ, Brazil), Prof. Dr. Boniek Gontijo (UFG, Brazil), and Prof. Dr. Renato Zanella (UFMS, Brazil).

Manuel Riveros is one of the great pioneers of mass spectrometry in Brazil, a world-renowned researcher, and an enthusiastic and active contributor to BrMASS, having served multiple terms as president. The BrMASS – Manuel Riveros Medal was instituted by BrMASS at its inception to honor distinguished individuals in the field of mass spectrometry in Brazil.

IBERO MS 2024 stood out for promoting international collaborations, strengthening dialogue between scientists from Latin America and other continents. The environment of experience-sharing encouraged strategic partnerships for future research and collaborative projects.

The success of IBERO MS 2024 reaffirms BrMASS's role as a key promoter of internationally relevant scientific events. The integration of specialists and the exchange of technological advances drive the development of mass spectrometry in Brazil and worldwide.

Exhibition

One of the highlights of IBERO MS 2024 was the technical exhibition, which brought together leading companies in the mass spectrometry and analytical instrumentation sectors. Renowned companies participated in the event, including Waters, Agilent, Thermo Fisher Scientific, Nova Analítica, Bruker, Shimadzu, Leco, and Sciex, among others. The exhibition provided participants with the opportunity to explore the latest innovations in equipment, software, and analytical solutions, as well as engage directly with company representatives to clarify doubts and establish partnerships.

For more information about the event and access to the presented content, you can visit the official BrMASS website: brmass.com.
